INDUSTRIAL METROLOGY

LEICA AT401

SYSTEM DESCRIPTION

Leica-401 series are portable coordinate measuring devices which allow you to manufacture products, optimise processes and offer solutions with fast and accurate measurements.

ADVANTAGES

- Very light with no need of using MCU.
- Huge measuring distance. 320 m in volume (160 m in length).
- Infinite rotation of axis.
- Target following.

LEICA AT401

APPLICATIONS

- Aerospace industry.
- Heavy vehicles.
- Energy generation.
- Navy building.

TECHNICAL DATA

7.3 Kg weight +0.8Kg control.

160m maximum measuring range.

+/- 15 μ m + 6 μ m/m accuracy

0.19 mm accuracy at 30 m length

Battery use for easier transfer.

Very short warm-up time.
